

How to make a circular window design.

Draw around a plate on black paper to make a circle.

Cut the black circle out.

Cut out a circle inside of the black circle, so you have a ring.

Cover the ring with coloured paper like tissue or cellophane. Stick the coloured paper to all edges of the circle and trim around the circle, so the coloured paper is inside the circle only.

Once you have your coloured circle, you can cut shapes and designs from black paper and stick them inside using glue.

This child made a space scene

This child made a desert scene with a camel, mountains and a starlit sky.

Materials and equipment

You will need:

- **A large plate**
- **Black sugar paper or any dark coloured paper**
- **Pencil**
- **Scissors**
- **Coloured paper like tissue paper or cellophane (tissue paper is easier to use with younger children.)**
- **Glue (a glue stick like pritt stick is best)**
